DAGESTAN MEDICAL FACTORY BEHIND SCHEDULE

B. Adzhiyev, Chief
Raw Materials Warehouse
Dagestan Factory, GlavLekTehProm
Khasavyurt, Dagestan ASSR

In 1943 the Dagestan Medical Factory fulfilled its plans by 120 percent and gave the State an additional 250,000 rubles' worth of medical preparations. At present, great effort is being made to decrease the production cost and improve operations. However, there are many factors which are tending to slow up production. For example, the Kizlyarskiy Station, Kavkaz Office of GlavLekTehProm (Main Administration of Medicotechnological Industries?) sent some 7,000 kilograms of marshmallow root. More than half of the root was useless and had to be destroyed. The Georgiyevskiy Station is also guilty of sending low-quality raw material. For the past 2 years the Procurement Department, GAFU, (Main Apothecary Administration) Georgian SSR, has been sending bad foxglove leaves. The Grozny Procurement Station has been sending low-quality wort leaves.

This situation has to be rectified in the very near future, as it is not only preventing full schedule production, but also wasting critical transport.
